

Dear host family,

My name is Ingrid Vanessa, I'm 18 and I was born in Colombia, where I lived for 10 years. I've been adopted by an Italian family and we live in Pavia (a city near Milan). I'm very short and thin and I have a lot of curvy hairs. I'm a kind girl and my favourite color is green, which is in fact the color of hope.

Also, I really love sport. I've practiced a lot of different sports but since I was a child I've always loved gymnastics and so I studied artistic and rhythmic gymnastics. Nowadays I practice aerial acrobatic gymnastics.

I also enjoy listening to music and watching films (I can say it's my second favourite thing to do, after sport). I can easily speak three languages (Spanish, Italian and French) while my English is not so good because since it is my fourth language I find a little bit difficult to remember. Nevertheless I'm going to study it hard because I want to be able to talk to everyone.

In the future, I'd like to become a doctor, especially a children doctor because I love children and because I've always been interested in medicine studies. Recently I have discovered my interest for electronic engineering and I'm really into it because I think our future will depend on technology.
